

*Objective: To be the first team crack the pearl smuggling ring!*

A new pearl smuggling ring has appeared in **Broome**, diverting millions of dollars away from local traders. Police have started their search for this syndicate, however your help is needed to pin point the identity of two of the main men. Your objective in CLUEDO is to sift through the evidence on file, decipher the clues left behind by the syndicate, work well as a team and ultimately discover the names of the men wanted over this newly appeared pearl smuggling ring.

## PROGRAM

This mystery is going to take some solving.....

As the **teams** arrive they will be allocated to the current case and given an up to date police file. They must read through their instructions, sift through the mounds of evidence and set up a strategy as they utilise compulsory planning time given to them. Teams will be told of the need to assist the police, the CIA, and the FBI to apprehend these Sierra Leone based criminals now operating in Australia.

Teams must work hard to open a nominated safe and complete the CLUEDO task that is inside. By finding the identity of the person that **“drives the limousine and the person that deals pink pearls”** the powers that be will be able to swoop on their suspects.

Upon completion of the brief, teams must make their way to a nominated location to begin gathering the required information. Throughout the program the teams will race to solve a variety of recreational or problem solving activities (these can be selected to suit the needs and wants of your company). As teams successfully complete tasks they will be given clues to the combination of the safe that hold further challenges.

In the safe will be the information needed to answer the 2 questions asked in the mission kit – who drives the limousine and who deals pink pearls. Teams must work their way through all the information provided to come up with the correct answers. The first team to do so will be crowned CLUEDO Champions.

Was it the butler, in the drawing room, with the candlestick?

### KEY PROGRAM OUTCOMES:

Information interpretation – Problem Solving – Deduction – Time Management – Lateral Thinking
